

# Setting up R for your project

Claire Hayman & Mike Spencer

# Rationale

- Making work more portable
- Improving collaboration
- Improving reproducibility
- Saving time and effort

# In scope

- A new install (R/IDE/etc.)
- General analytical project
- Collaboration (at minimum with future you)

# Prompts: non-exhaustive!

- IDE settings
- Version control & collaboration
- Directory structure
- Packages and environments
- Data sources: online/caching/local
- Handling outputs

# Common improvements or gotchas

- `setwd()` -> RStudio projects
- `rm(list = ls())` -> `sessioncheck::sessioncheck()`
- `print()` debugging -> `icecream::ic()`
